# Course Overview

This workshop offers a unique opportunity to observe and learn from Dr. Alex Nguyen, a renowned oral surgeon in implant dentistry, as he demonstrates the comprehensive approach to Full Arch Rehabilitation using All-on-X with Conventional, Pterygoid, and Zygomatic Implants. The course is designed for dental professionals seeking to enhance their skills in pre-clinical planning, surgical techniques, and restorative workflows for complex implant cases.

## Course Objectives

- ✓ **Master Pre-Clinical Planning:** Gain insights into the critical aspects of pre-clinical planning for All-on-X cases, including patient assessment, treatment planning, and case selection.
- ✓ **Surgical Techniques:** Observe and understand Dr. Nguyen's advanced surgical techniques for placing Conventional, Pterygoid, and Zygomatic Implants. Learn about surgical protocols, incision designs, and anatomical considerations for successful implant placement.
- ✓ **Optimize Restorative Workflows:** Explore the intricacies of restorative workflows involved in Full Arch Rehabilitation. Dr. Nguyen will share his insights on prosthetic design, material selection, and the integration of digital technologies for precise and efficient outcomes.
- ✓ **Problem-Solving in Real-Time:** Witness Dr. Nguyen's problem-solving skills as he navigates through potential challenges during live surgical and restorative demonstrations. Learn how to adapt to unexpected situations for successful case outcomes.
- ✓ **Interactive Discussions:** Engage in interactive discussions with Dr. Nguyen, allowing participants to ask questions, seek clarifications, and delve deeper into the nuances of All-on-X implantology.

**DR. ALEXANDER NGUYEN**

DDS, OMS

Dr. Alexander Nguyen is a board-certified oral and maxillofacial surgeon in the Phoenix, AZ area and is the owner of a busy private practice. He received his Doctor of Dental Surgery degree from the University of Southern California in Los Angeles, CA, and then completed a rigorous four-year oral and maxillofacial surgery residency at the Carle Foundation Hospital in Champaign-Urbana, IL.

His training there included: full facial reconstruction from traumatic injuries, head and neck cancer ablation with reconstruction using local and free flaps, benign tumor and cyst management of the head and neck, cleft lip and palate repair, craniofacial surgeries on children and neonates with facial abnormalities, open tracheostomies for the Intensive Care Unit, corrective jaw (orthognathic) surgery, dentoalveolar and dental implant surgery with bone grafting, and delivering safe anesthesia to pediatric and adult patients. In the office, he has taken an interest in full-arch dental implant rehabilitation and complex dental implant techniques, such as zygomatic and pterygoid implants. With a firm belief in properly educating other providers, he has found a passion for teaching dental implant courses. Along with being in the office, he practices the full scope of oral and maxillofacial surgery. He has full hospital privileging and exercises it at multiple medical centers in the area, many of which are Level 1 Trauma Centers. He is certified in Advanced Trauma Life Support, Advanced Cardiac Life Support, Pediatric Advanced Life Support, and Basic Life Support. He is a Diplomate of the American Board of Oral and Maxillofacial Surgery, Fellow of the American Association of Oral and Maxillofacial Surgery, Fellow of the American Dental Society of Anesthesiology, and Diplomate of the National Dental Board of Anesthesiology.
