# Course Overview

EZgoma® is a pioneering patented guided surgery system, developed by Noris Medical to assist in complex zygomatic and pterygoid implant procedures.

For the first time, dental surgeons can plan the zygomatic and pterygoid implant procedure ahead of time and execute it precisely guided, based on the patient's CT scan, instead of conducting it in a blind free-hand style.

Using proprietary 3D software and the patient's CAT scan, we create a surgical guide made of Titanium, that fits perfectly onto the patient's Maxilla. Supported by the designated EZgoma® Surgical Kit, the drilling process is achieving the most precise procedure and results available to clinicians today.

Participants will learn the steps to be followed to duly plan and perform an EZgoma® case with zygomatic & Pterygoid implants and successfully treat patients suffering from the severely atrophic jaw.

It will be explained how to import DICOM files into the guided surgery software and match them with STL files from diagnostic wax ups.

During the Hands-On session, participants will work on a real case 3D model. Under the monitoring of tutors, they will perform the step-by-step drilling protocol until the implant insertion, with the support of the customized EZgoma® guides throughout the process.

## Course Objectives

- ✓ Overview of surgical anatomy
- ✓ Traditional Guided Surgery Vs Zygomatic Guided Surgery
- ✓ Digital prosthetic planning:
- ✓ DICOM – STL file matching for correct use of the guided surgery software
- ✓ Use of the guided surgery software for an accurate zygomatic implant insertion
- ✓ Hands-On session performed by participants on 3D models with EZgoma® surgical guides

*Speaker*

## Prof. Francesco Zingari, DDS

Graduation in dentistry and prosthetics at Università degli studi di Milano.  
Since 2005 freelancer of the maxillofacial unit at Istituto Ortopedico Galeazzi in Milan.  
Adjunct professor of prosthetics on zygomatic implants at Università statale in Milan.  
Adjunct professor of implantology at Università degli studi di Parma.  
Speaker at the II degree post-graduation master in digital and guided surgery.  
Speaker at training courses in advanced implantology and anatomical dissection.  
An active member of the Digital Implant & Restorative Academy (Di&RA).  
Author of national and international publications.

## Cancellation Policy

We offer a flexible cancellation policy for our courses. If you need to cancel your registration, we ask that you do so at least one month before the scheduled course date to receive a 50% credit. If you cancel before the two-month deadline, we will provide a full credit. Unfortunately, we cannot offer any credit for cancellations made within one month of the course date, unless it is an individual case such as illness, which will be reviewed and decided by the regional manager. It is important to note that the credit for hotels is separate from the course cancellation policy. We highly recommend booking your hotel accommodations with a flexible cancellation option. This will provide you with the necessary flexibility in case of unforeseen circumstances that may require you to cancel or change your hotel reservation. For doctors who have purchased implant packages, we offer credit for product purchases only. This credit is not transferable to other products or services. If you have any questions or concerns regarding your implant package credit, please contact our customer service team for assistance.
