

EVENING STUDY CLUB

SURGICAL EXTRACTIONS WITH IMMEDIATE IMPLANT PLACEMENT

COURSE OVERVIEW

This study club provides an in-depth review of surgical extraction techniques and instrumentation used to preserve native alveolar bone and support immediate dental implant placement. Participants will examine key clinical considerations, including atraumatic extraction, socket preservation principles, residual bone evaluation, implant sizing, positioning, and primary stability.

Through evidence-based discussion and case-focused education, the session will highlight practical protocols designed to improve clinical decision-making and support predictable outcomes following extraction.

OBJECTIVES

Upon completion of this study club, participants will be able to:

- ✓ Review evidence-based principles for immediate dental implant placement following tooth extraction.
- ✓ Apply techniques to preserve and maximize residual alveolar bone during surgical extraction
- ✓ Evaluate anatomical considerations to support implant selection, positioning, and primary stability.
- ✓ Identify surgical instrumentation and clinical protocols that facilitate predictable immediate implant placement.
- ✓ Recognize key factors that influence treatment outcomes and reduce the risk of complications.
- ✓ Integrate practical, evidence-based concepts into clinical decision-making for immediate implant therapy.

Speaker
Dr. Aaron Pryor, DDS

Dr. Aaron Pryor, DDS is a family, cosmetic, and implant dentist in Lebanon, Tennessee, with over 24 years of experience. A local native, he leads Pryor Family Dentistry, PC, providing advanced, patient-focused care—from same-day crowns to full-mouth implant reconstruction. He also operates an in-house dental lab specializing in implant restorations. Dr. Pryor served as a dental officer in the U.S. Air Force, completing an Advanced Education in General Dentistry (AEGD) at Eglin Air Force Base and earning over 500 hours of advanced training in surgery and

anesthesia. He received the Meritorious Service Medal for his contributions to operational readiness at Little Rock AFB. In addition to clinical practice, Dr. Pryor is an associate professor in GPR residency programs at Meharry Medical College and LMU Dental School. He is an active member of the ADA, AGD, DOCS, AAD, and AAFE.
